University of Cincinnati,
College of Medicine,
Cincinnati,
U.S.A.

Dear Dr. Sabin,

You will recollect the discussion we had during the afternoon you spent in Prague. I was very happy to have the opportunity to hear from you the preliminary results of the field trial of the poliomyelitis vaccine in Czechoslovakia. You mentioned to me also that you hoped to be in Europe at the end of August and that you would accept my invitation to come and see us at Greenford. I shall be most grateful if you can let me know if there is a possibility of your coming to England. If you can let me have a more definite date for your arrival I can then make the necessary arrangements.

In the meantime we look forward to hearing something of the outcome of the discussion you had recently in New York on the results of the field trials with the attenuated virus vaccine. No doubt there were a lot of arguments and comments, but I am fairly convinced that the time is more than ripe for serious consideration of the merits of the attenuated virus vaccine.

With kind regards,

Yours sincerely,
