Dear Dr. Sabin:

As you know, the domestic Pfizer organization is planning on producing your vaccine at our Vigo Plant. We anticipate initiating production of licensing lots early this fall and would like to start as soon as possible on a program for preparing high yielding seed virus of Types 1 and 2. We would greatly appreciate receiving 100 mls each of the Type 1 and 2 virus material prepared for you by Merck, Sharp & Dohme. In the event that your supply of this material is low, it would be appreciated if you would authorize us to request it from the Medical Research Council in England or from Pfizer Limited.

I greatly enjoyed the opportunity of meeting with you on June 20 and found your comments to be most enlightening. We are presently evaluating a number of suggestions which you made at that time under the circumstances existing in these labs.

Sincerely yours,

CHAS. PFIZER & CO., INC.

D. S. Mabry
