RESEARCH DEPARTMENT

September 26, 1967

Dr. Albert B. Sabin
The Children's Hospital Research Foundation
Elland Ave. and Bethesda
Cincinnati, Ohio.

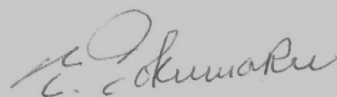

Dear Dr. Sabin;

Enclosed is a manuscript entitled "The characteristics of febrile responses to herpes simplex virus in guinea pigs". This one is almost a by-product of previous work which you have most kindly taken up to your Archiv für die gesamte Virusforschung.

I would be most grateful to you if you could review this manuscript for possible publication in the same Journal.

With kindest personal regards,

Sincerely yours,

Tadasu Tokumaru, M. D.

1. Check corrections made in pencil and correct on typewriter (still too many typograph. errors). Retype pages 8 and 9
2. Please note "herpesvirus" should be one word.
3. Animals are not "injected" - they are inoculated; the materials given to the animals are ~~not~~ injected
4. Comment on ~~past~~ statements on p. 5 and 7
