November 12, 1964

Joseph S. Pagano  
The Wistar Institute  
Thirty-Sixth Street at Spruce  
Philadelphia, Pennsylvania

Dear Doctor Pagano:

I am returning your manuscript on Diploid Cell Strains. There was no support in favor of publication, either by the Editorial Staff or by the out-of-office consultants.

There was general agreement that the basic data presented were not new and that the argument against monkey kidney tissue was poorly supported.

Under the circumstances, the manuscript is being returned to your office.

Sincerely yours,

John H. Talbott, MD
