Dr. Albert Sabin
Children's Hospital
Cincinnati 29, Ohio

Dear Albert:

I am sorry that you will be unable to provide an exhibit, but I can see that it is impossible.

Regarding the use of calves for the study of "Ekiri", I hope to have some calves some time around July 1st. I would be very pleased to inoculate the material if my plans do not go awry. I would suggest that the people in Japan communicate with me about July 1st. If I can possibly do so I will do calf inoculations. One other point comes up, that is, could we be reimbursed for the "Ekiri" work? As you know, meat at this time is quite expensive and I wonder about the cost just a little bit.

I suppose I will see you at the Congress. If I don't, good luck on your trip to Copenhagen.

With kindest regards from all of us to you and Sylvia, I am

Sincerely yours,

[Signature]
