December 12, 1961

Dr. Henry M. Gelfand
Chief, Enterovirus Unit
Department of Health, Education, and Welfare
Communicable Disease Center
Atlanta 22, Georgia

Dear Henry:

The Enterovirus Committee of the NCI has been abolished, but we have been reincarnated as the Panel on Enteroviruses of the NIAID. All the old members have been invited to remain on the new committee.

However, administratively, the NCI will continue to support the Panel's activities until July 1, 1962, when the NIAID's staff is scheduled to take over.

Sincerely yours,

Joseph L. Melnick
