Doctor A. B. Sabin  
University of Cincinnati  
Cincinnati, Ohio  

Dear Doctor Sabin:

We are pleased to learn from Doctor Erwin Neter that you will present a paper on "The Significance of Viruses Recovered from the Intestinal Tract of Healthy Infants and Children" at the conference on "Epidemic and Endemic Diarrheal Diseases of the Infant" which will be presented by The New York Academy of Sciences on December 8 and 9, 1955.

The Academy reserves priority of publication and the presentation of your paper at this meeting constitutes your agreement in this respect.

In reference to Doctor Neter's letter to you on June 23, 1955, in which he requested that you submit an abstract of your paper not to exceed 300 words to the Academy, for inclusion in the set of preprints which the Academy prepares for the speakers and participants at the conference, we request that you send this abstract to this office not later than October 15. In addition, that you have your final manuscript in the hands of Doctor Roy W. Miner, Editor of the Academy, not later than December 15, 1955.

The Academy's printing schedule is entirely up to date and your cooperation in meeting these deadlines will not only facilitate the preparation of the data for the preprints, but will also enable the Academy to print and publish the resulting monograph very early in the next calendar year. You, no doubt, will realize that prompt publication of the conference monograph further enhances its value and brings the work, upon which you report at this conference, into the hands of the other interested investigators in the field at the earliest possible date.

Should you find it necessary to make changes in your manuscript on the basis of the conference proceedings, you will have an opportunity to do so when the galley proof is sent to you. Although the size of the manuscript and bibliographical data, the reasonable use of plates, line cuts and tables are left to the discretion of the author, we ask that these manuscripts be submitted legibly typewritten and double-spaced throughout and that plates, line cuts and tables be in condition to send to the printer. Any use of color plates, will require that the author obtain a grant, from outside sources of the necessary funds to make possible the inclusion of such color plates in the monograph.
We are enclosing a copy of "Instructions to Authors" which may be of help to you in preparing your manuscript.

We should also like to learn whether you plan to use projection and if so, whether it will be standard size slides, 3 1/4 x 4; 2 x 2 Kodachrome and/or 16 mm film, silent or sound. It is necessary for us to have this information that we may arrange for the use of suitable projection equipment.

A copy of the preprints and copies of the program will be sent to you as soon as these are ready for distribution.

We look forward to the pleasure of having you with us at this meeting and to extending to you the courtesy and hospitality of the Academy.

Most sincerely yours,

[Signature]

Executive Director
