Dr. Albert B. Sabin,
The Children's Hospital Research Foundation
Elland Ave. and Bethesda
Cincinnati 29, Ohio

Dear Doctor Sabin,

I hope you came back home fine and not very much tired with all the meetings you attended and the travel you have done. I hope too that you have met all your family very well.

I am sending you the toast of Dr. Rocha Pereira. he told me that the simple and sincere words he wrote for you have little value, but if you can remember the emotion he felt when he read them, then he will be pleased.

With my best regards to Mrs. Sabin, I am,

Sincerely yours,

Manuel R. Pinto.
Dear Prof. Albert Sabin,

As the Dean of the Faculty of Medicine you have honoured with your visit and with your most interesting lecture, whose value in the immunological and social field we greatly appreciated, I wish to greet you again in my personal name, as well as of my colleagues', and to thank you for all we have learned with you today, on such a momentous problem.

I must also thank you for having accepted our invitation to this modest lunch, which is only credited with being served in a University department, so that it has enabled us to have a few more hours of friendly and merry contact with one of the most distinguished American scholars. And, at the same time, we remember with gratitude how the Professors of the College of Medicine of Cincinnati have once been kind enough to do the same to a few foreign professors, among whom were Prof. Leriche, the world-famous scientist, and Prof. Sousa Pereira, a most distinguished researcher of our Faculty in the surgical field.

It is our greatest wish that you should carry with you to your fruitful and prosperous country the warmest recollections of Portugal, of its hospitable people and of the Professors and Researchers who have been lucky enough to meet you personally.

I toast to your very happy return home and to your personal happiness, as well as your family's, and also to the progress of your great country, most of all in the scientific field, in which the University of Cincinnati occupies such a prominent place.
