This is a book containing clay-coated fold out maps. The textblock was surface cleaned with Absorbene smoke sponges and vinyl eraser blocks. The fold outs were torn and detached throughout every page. Some leaves were adhered with pressure sensitive tape. The tape carriers were removed mechanically with heat. Leaves and foldouts were repaired with Filmoplast R heat set tissue. A loose leaf with text, labeled ‘column 122-123,’ was reattached with Uso Mino tissue and wheat starch paste.
