

Preservation Lab - Abbreviated Treatment Report

Database ID 1091
Department Classics Library
Item Record # i34384893
Call Number cl-g PA5610.B72 P6
Title Pompholyges
Author Voutzinas, Phōkion A
Imprint

Date Returned to Origin 2/17/2016

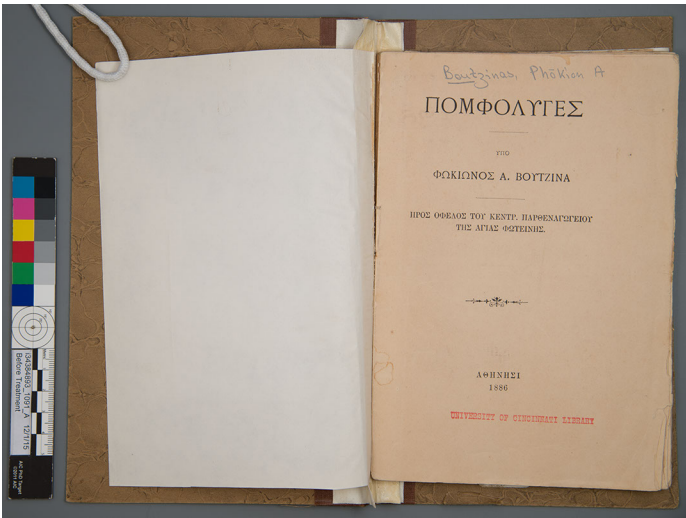

1	In-house Repair 1	Repair/restore binding
	Performed In-house Repair	Catarina
	Staff Type Conservator, Technician, Student	T
	Time In-house Repair	70
2	In-house Repair 2	Mend paper
	Performed In-house Repair 2	Catarina
	Staff Type Conservator, Technician, Student	T
	Time In-house Repair 2	65
3	In-house Repair 3	Tux Box
	Performed In-house Repair 3	Catarina
	Staff Type Conservator, Technician, Student	T
	Time In-house Repair 3	65
4	Type In-house Repair other	Photographic Documentation
	Performed In-house Repair other	Jessica Ebert
	Staff Type Conservator, Technician, Student	T
	Time In-house Repair other	35

Conservator's Note

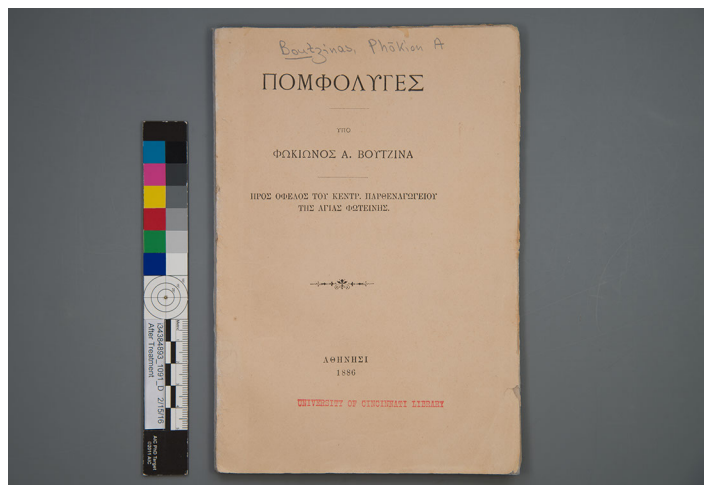

The pamphlet was received with lost covers and broken sewing in the back. The text block was mechanically removed from an inherently acidic pamphlet binder. The title page was surface cleaned with an Absorbene smoke sponge, and the tears along the fore edge were mended with Tengujo kozo tissue and wheat starch paste. Also, the tideline stain on the title page was locally reduced with filtered water and controlled drying with blotter paper. The spine of the text block was cleaned with a poultice of methyl cellulose and lined with Sekishu tissue and wheat starch paste. The last gathering was re-sewn with a free guard through the original sewing holes and through the Sekishu lining. The pamphlet was rehoused in a tuxedo box inside a two flap chemise.
