Tel-Aviv - Jaffa, Israel

Dear Tamar,

In reply to your letter of August 30, I should like to say that I have no objection to your adding a footnote to your paper regarding the C-F test that I carried out on your sera. I would suggest that you use your own wording for this note but indicate that only 3 of your sera were tested with the 5 antigens that I described in my letter of July 30.

With best wishes and kindest personal regards.

Sincerely yours,

Albert B. Sabin, M. D.
