

April 11, 1962

Mr. Gerald J. Bowsher
3873 Monroe Street
Toledo 7, Ohio

Dear Mr. Bowsher:

In reply to your letter of April 9, I think it is very nice that you would like to work on the effect of certain viruses on a developing chick embryo. Obviously you will need a virus that multiplies in this embryo. However, when you ask me for information on previous research along this line, I can only suggest that part of your training as a graduate student is to learn how to look up the literature and find out such things for yourself. I would suggest, however, that you may find it helpful to write to Dr. Russell J. Blattner (Baylor University College of Medicine, Texas Medical Center, Houston 25, Texas) for his reprints on this subject.

With best wishes.

Sincerely yours,

Albert B. Sabin, M. D.
