RE: Letter to Editor #XLVIII-67

Dear Doctor Martins:

Doctor Sabin writes in answer to my inquiry about your Letter which we have listed as numbered above that he received the same letter from you on June 23, 1966, and that he wrote you the best answer he could on July 24, 1966. He also writes that he will be the guest of the Brazilian Congress of Pediatrics next July and will be speaking on live polio virus vaccines so that you may be able to get further information from him then.

Meanwhile, since your letter to me is rather a long one, since it has already been answered by Doctor Sabin, and since he could himself find no specific questions in it, I believe we should not use the very valuable space in our Letters division for printing this one from you.

Sincerely yours,

*CAS/bb*

Clement A. Smith, M.D.  
Editor
