Conservator's Note

This is a half leather binding suffering from a detached board and severely red-rotted leather. The leather was consolidated with Klucel G 3% in isopropanol and bits of lifting leather were readhered with Lascaux 498 HV. The board was non-adhesively reattached with a polyethylene cover. To attach, a 20 pt. board was hinged onto the last page of the textblock with kozo tissue and wheat starch paste. The cover was laid in place loosely, and the Colibri jacket was heat welded with the 20 pt. board inserted into the jacket sleeve with the back cover. All parts were retained. To see the pages still attached to the boards, the CoLibri jacket can be slid off.
