

June 18, 1964

Dr. M. Butler  
Department of Virology  
Wellcome Research Laboratories  
Beckenham, Kent, England

Dear Dr. Butler:

I read with great interest your article entitled: "A Mycoplasma which Induces Acidity and Cytopathic Effect in Tissue Culture" which appeared in the Journal of General Microbiology, February 1964. I would appreciate it very much if you could send me a reprint of this paper -- if possible by air mail.

I would also appreciate it if you could let me know whether or not the HEp 2 culture tubes that you used in this study were stationary or rolled, and whether the mycoplasma you isolated was sensitive or resistant to kanamycin. I would also be very grateful if you could send me a few cc of the antiserum for this mycoplasma.

With best wishes.

Sincerely yours,

Albert B. Sabin, M. D.

ABS:meh

P. S. Please give my kindest personal regards to Dr. Edward.
