Dear Dr Sabin,

Thank you for your letter of 16 May and for the memorandum attached.

I agree with you on the importance of surveillance in connection with the oral poliomyelitis vaccine programmes, and have been stressing the importance of this in areas where the laboratory facilities permit this to be done.

Your plan will form a good basis for such studies in the future though, as you say, it will have to be modified to suit local conditions. I have ~~examined~~^{missed} the literature on the relation of breast feeding to "takes", and should be most grateful for references.

With best wishes.

Yours sincerely,

W. Chas. Cockburn
