Dr. Albert Sobin  
University of Cincinnati Medical School  
Cincinnati, Ohio.

Dear Dr. Sobin;

I understood that you have done quite a bit of work in the diagnostic method of Sofoplesmin. I should appreciate the laboratory methods which you employ in checking to see whether a patient has this disease.

I would appreciate any information you may offer me on this subject in - Diagnosis by laboratory methods and also if there are any signs of a slide that you can spare I would be most grateful.

Your cooperation will be most appreciated

Sincerely  
Charles J. Falderson  
Dent.
