## Abbreviated Treatment Report

Description: This is a scrapbook from T. A. Langstroth. The scrapbook covers are laced with two plastic tapes that are stapled to the text block. Each text block folio is stapled through the fold onto the tapes. The spine of the scrapbook is exposed, showing the two stapled tapes. The upper cover of the scrapbook has a pinned lacquered plate with abalone shell embossed decoration attached. The lower cover shows no decoration. The text block has several types of ephemera, from typewritten notes, photographs, bills, and small pamphlets adhered. The text block is wedge shaped.

Condition: The scrapbook is in good condition, with the lacquered plate on the upper cover showing some craquelure deterioration and loss of one of the embossed abalone shells. The text block is in good condition with the materials fully affixed.

Treatment Proposal: Housing only. Constructed a corrugated clamshell enclosure.

### Conservation Treatment:

1. Corrugated clamshell with 1/4" Volara foam attached to verso of lid and wedge attached to recto of base to provide additional support to the wedge shaped text block. [HAP, 60 min].
