

Polic

June 18, 1940

Dear Doctor Gonce:

Doctor Mitchell has asked me to reply to your letter of June 15. We both appreciate very much your promise to help us if you should be in a position to do so.

Unfortunately, we are interested primarily in patients in the early stages of either non-paralytic or paralytic poliomyelitis, and cases whose paralysis has been present for three or four weeks are already of too long standing for our purpose.

With many thanks,

Sincerely yours,

Albert B. Sabin, M.D.

Dr. J. E. Gonce, Jr.
