Dear Sir:

In about two or three weeks after taking the polio sugar pill, known as type 1, I developed Rheumatoid Arthritis. I understand that these polio viruses are alive and live in the Colon of the body. I believe my system has developed an Allergy because of the polio viruses. Some authorities state there are instances where viruses remain latent--where is undeterminable. I believe these viruses are in my right leg.

What I would like to know is there any effective medications, Antibiotics & etc., developed to fight these polio viruses and help my body eliminate them out of my system. My physician says that Dr. Sabin is the only man that can answer this problem. Note; I only taken the first polio sugar pill known as type 1.

Any information you send will be appreciated. If there is any cost for this information Please let me know.

Very truly yours,
