CINCINNATI 29, OHIO

ALLEGATI RISPOSTA alla lettera del 23/X/57

OGGETTO : Poliovirus strains.

Dear Dr. Sabin:

We have received the attenuated poliovirus strains which you sent to us and we have propagated them in monkey kidney tissue culture.

At the moment our program is to study same aspects of propagation in different type of human cells in vitro.

Thank you very much.

IL DIRETTORE GENERALE
(Domenico Marotta)
