AMERICAN ACADEMY OF  
OPHTHALMOLOGY AND OTOLARYNGOLOGY

KENNETH L. ROPER, M.D.  
SECRETARY FOR  
OPHTHALMOLOGY

55 EAST WASHINGTON STREET  
CHICAGO 2, ILLINOIS

April 8, 1953

Dr. Albert B. Sabin,  
Children's Hospital,  
Cincinnati, Ohio.

Dear Dr. Sabin:

Dr. Alan Woods is giving a paper on  
"The Study of the Possible Role of Toxoplasmosis in  
The Etiology of Adult Uveitis" at the forthcoming  
Academy meeting to be held here in Chicago, October 11-  
16.

Mindful of your great interest and  
contributions to the problem of toxoplasmosis, I am  
wondering if you would be one of the discussors of  
Dr. Woods' paper.

Discussions of papers presented at  
the annual scientific sessions are usually limited to  
ten minutes' time, but one's remarks for publication  
purposes may, of course, be extended.

Looking forward to hearing from you,

Sincerely,

Kenneth L. Roper, M.D.
