Dear Albert:

I am delighted to have your acceptance expressing your willingness to serve on the Commission on Neurotrophic Viruses. I have just received the schedule of your whereabouts during March. It would seem unlikely that we shall be called upon to do anything during the next six or eight weeks, but at least a preliminary draft of plans will be made of which you will receive a copy. Some time in April or early May we will have a regular meeting.

Have a good time on your vacation.

Sincerely,

John R. Paul
