Dr. Pearl B. Holly  
900 - 17th Street, N. W.  
Washington, D. C.

Dear Dr. Holly:

Your letter of January 27th came during my absence from the city and I regret the delay in replying to it. If your patient will be available to you during the next 3 months, I should be glad to send you the vaccine for her. It would be necessary for you to give the type 1 first. About 4 weeks later the type 3 and 4 weeks after that the type 2. This would be done by adding about 0.1 cc. of the vaccine to a teaspoonful of syrup or any other pleasant liquid that she could swallow. Please let me know if she is still available and if you wish to have the vaccine.

Sincerely yours,

Albert B. Sabin, M. D.
