Le 4 Mars 1996

sent to NIA

Cher M<sup>r</sup> Sabon,

je viens de retrouver votre lettre honoree de 1986 dans laquelle vous ne vouliez plus aucune discussion sur la genese virale de la cellule cancéreuse alors qu'elle avait été admise pour la maladie de Burkitt et que je l'avais expliquée pour les leucémies en général comme M<sup>r</sup> Lépine chef de service de la virologie à l'Institut Pasteur de Paris.

Je ne reviendrai plus sur cette affaire qui nous a séparés.

Depuis dix ans je m'occupe de la Formation Médicale continue en France et en Amérique à l'occasion.

J'ai relevé tous les manquements à cet enseignement et j'ai conçu tout un programme de Renouveau de la Médecine de Famille pour mes jeunes confrères de France et d'Amérique.

Le temps m'est compté pour le reste de ma vie à être utile pour l'humanité - Vous faites partie du Health Service et c'est pourquoi je vous le soumetts comme je le fais aux savants de ma connaissance avec les faibles moyens qui sont les miens.

J'ai suivi la Médecine de Famille toute ma vie. Elle m'a enrichie de connaissances mal explorées hors de portée des Médecins hospitaliers et des chercheurs agités, engagés par des concepts dépassés tels que monothérapie et statistiques variables d'une année à l'autre, d'un spécialiste à l'autre. L'être humain est complexe dans son esprit et dans son corps.

Puissez vous me comprendre dans ce que j'apporte de nouveau

Bien respectueusement votre

A la grâce de Dieu

# Family Practice's Renovation

Local Immunity (Allergic Predisposed Toci to prevent and Cure.)

General Immunity (Antagonisms and Complementaries)

Naturally Acquired Immunity (Spontaneous Recoveries : Causes and how to reproduce them)

Parental Immunogenic Hemotherapy sub cutaneous used during 50 years with success for children and old persons

Immune Potentiality of Human Beings variable since the conception to the death

Why Placental Gammaglobulins are precious.

The Growth of the Skeleton and its demineralisation with age and intercurrent diseases.

Analogy with the osseous marrow base of Immune system

The derivations of the Immune system of different causes

The unknown avitaminosis in France.

The acquired Immune deficit in infectious disease

The Viral genesis of the cancerous cells and their consequences

The Viral penetration by natural ducts

Oro Rhino Pharynx Strategic cross road of Infectious diseases

The Galactophores ducts

The Genital urinal Anal - doors

The Metabolism of mineral salts (Pb, Mg, Ca, etc) in the infectious diseases

The Experimental Psychology of Instinctive compartments (Sex - Procreancy - Laziness or Inhibition - Jealousy or greediness)

The Patient's psychanalysis in his familial Socio professional environment

Mass medias influence on the compartment of people at every ages

In the social laws, the surstimulation of people -  
The allergy against the Cow Milk -  
(Gastroenteritis Colicoma # Eczema)

## I The Immunogenic Parental Hemotherapy

Subcutaneous is totally different from  
Intravenous Blood transfusions and any danger  
of them.

First Any contact of blood with other blood  
of other people else massive and mixed to replace  
the hemorragic loss with the dangers of  
Incompatibility of groups and contaminations by microbes  
and virus.

The choice of the donor is in the family member sane  
and in good health who had the same contaminations  
than the patient with naturally acquired immunity.  
The little doses repeated used are injected subcutaneous.  
The Red Cells are destroyed locally.

Only Serum and Lymphocytes removed progressively  
by lymphatic ducts

To avoid the formation of a clot you have to add

Citric solution or Heparin to the blood being of  
Immediate use (2 cc for the baby - 20 cc for an adult 3 times  
a week) - as longer use as necessary to obtain the immunity

The parents never refuse their blood to cure the patients  
(except the Jehova Witnesses). They are happy to participate to  
the recovery of many infectious diseases of viral and microbial genesis

II The power of Placental Immunoglobulins is due to the double  
origin of Placental blood = Immune system of the mother and  
the Immune system of the baby.

The acetone crisis unknowns.

The abdominal Tuberculosis unknowns

The inflammation and the infection to cure at the same time

The diverser radiations in medicine (diagnostics and cure)

The prevention of the subit deaths and the strokes in

atheromatous and Varicuous diseases

The Natural delivery without drogues and brutality by

Conditioned Psychic Reflex Education

The Struggle against droghs by

Conditioned Psychic Reflex of Repulsion permanently.

A drug addicted human is not free but slave of the drug.

unto Moral - Familial fall -

The passions are to be moderated not exalted -

Better is the reeducation than the repression in our society

of their compartment and concentration

Sexual act is not a proof of love but Possessive instinctif act

equal for the beasts and the human beings.

That is the rôle the function of the Family practitioner in the

future like in the past society for preventing the destruction

of the family, ultim refuge of the people.

How Research and Medetation to include and complete

the mind of great savants who preceded myself in working.

The Psychology like Medicine must be experimental, but over that

I cured the patients but God gave them recovery because I had

the respect of Natural laws. Even that was my work.
