Dear Dr. Sabin:

On behalf of the Medical Center, I would like to express our appreciation to you for accepting the University's invitation to serve on the Advisory Council for the International Symposium on Refugee Health. As you know, this program will be held next year as a part of the University's Bicentennial Celebration.

Georgetown has been fortunate in acquiring much direct experience in the area of refugee health and relief. This symposium will provide an excellent opportunity to share this knowledge with professionals from many different fields, for the betterment of the growing population of displaced people around the world.

Thank you again for offering your support.

Cordially,

John F. Griffith, M.D.
