7TH ST. AND INDEPENDENCE AVE. SW.
WASHINGTON

19 October 1943.

Major Albert B. Sabin,
The Childrens Hospital Research Foundation
Elland and Bethesda Avenues
Cincinnati, Ohio.

Dear Major Sabin:

Thank you very much for sending me the records from the cases of epidemic hepatitis. Sections have been cut in duplicate and you will receive a set just as soon as I have completed my examination. I cannot tell you how much I appreciate your kindness; we think it is important to learn whether the disease in Africa is similar or disimilar to the one we had here.

Do you think that it would be proper for us to write to Major Stewart, through proper channels, and ask him whether he cares to have some of our material and whether we in turn may have more of his. General Sir Alexander Hood was here the other day and he seemed very sympathetic to our suggestion to exchange material and perhaps even exchange an officer or two.

I hope that when next you find your way to Washington you will take the time to stay for a little while and have dinner.

With kindest personal regards.

Sincerely yours

Baldwin Lucke
