Dear Albert,

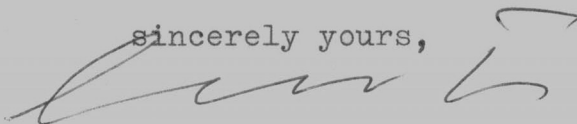

Your accident has deeply touched me. What for heavens sake have you to do with dogs ? I imagine that keeping bed might be not quite conforme to your temper. So, please believe in my sympathy.

I just received the paper of

Tokumaru: "The protective effect of different immunoglobulins against herpetic encephalitis and skin infection in Guinea pigs" which you have so carefulling edited.

With all good wishes I am,

sincerely yours,

PS. I hope that your visit in Switzerland will be only postponed
