Conservator's Note

This book was treated in preparation for digitization. There were sections of pages that had not been cut, which prevented digitization of all openings. Previously, a call number label had also been applied directly to the spine of the book and a bar code label was adhered to the front cover. There was also some delamination of the book cloth at the head and tail of the spine.

All pages of the textblock were cut at the head and foreedge to allow access to each page opening. The call number label was removed from the spine with a Zephyrtronics air pencil. The adhesive residue was reduced with a vinyl eraser. Any remaining adhesive residue was removed with a crepe eraser. The barcode label was removed from the front cover with a Zephyrtronics air pencil. The adhesive residue was reduced with a crepe eraser. The delaminated cloth at the head and tail of spine were re-adhered with wheat starch paste. The front and back interior hinges were reinforced with Uso Mino (thinnest) V-hinges and wheat starch paste. The book received a protective CoLibri jacket, and a new call number label was adhered to the CoLibri jacket at the spine.
