from Mexico Jan. 5

Dear Albert:

I have your letter of 19 December. As I wrote in my first letter, I was certain that your name had been proposed before: How could it not have been!

On the basis of your accounting I would like to be the twenty-first to nominate you. I did not have in mind an argument based on the practical accomplishments of the vaccine, for that cannot have escaped anyone, but rather on the basic conceptual and theoretical implications of the use of the vaccine. So do send ~~me~~ the information I asked for.

"To be eligible for consideration for the 1974 Nobel prize, nominations must be received by the committee before February 1, 1974." (emphasis theirs, not mine)

I do hope we have a reunion before long. Merriam sends her love.

Yours,
