

Dr. Moshe Prywes

April 29, 1968

Dear Moshe,

I want to take this opportunity to thank you again for all the kindness and consideration you showed me while I was ill.

You undoubtedly know Dr. Robert Goldwasser (currently in U. S. A. with his family on "Sabbatical" and soon returning to Israel) whom I have known since he worked with me in Egypt in 1943. I have seen him and his family often during my visits to Israel. His son, Benad, a very bright student intends to apply for admission to the medical school in Jerusalem, and his parents asked me if I would recommend him. For some reason they sent me a form from the Office of Academic Affairs of the American Friends of the Hebrew University that is intended for Americans applying to the Hebrew University, even though Benad, like his parents, is an Israeli.

I know the boy and would like to recommend him very highly for admission to the Medical School. Could you please let me know to whom on the Admissions Committee in Jerusalem I might send a letter of recommendation.

With many thanks and kindest personal regards,

Albert
