

**MEMO TO:** Members, Associate Members, Principal Investigators of the Viral Infections Commission, A. F. E. B.

**SUBJECT:** Time of Spring Meeting

**FROM:** W. McD. Hammon, M. D., Director

**DATE:** October 24, 1960

Since we ordinarily determine the time of the spring meeting at the fall meeting, this would appear to be appropriate. This year the meeting was March 10 and 11 and Thursday-Friday are our customary days.

I checked with Col. Rizzolo regarding the availability of March 9 and 10 in 1961 and found it open but he expressed a preference for April if equally good for us. The only Thursday-Friday combination available, however, was April 13 and 14. This on the basis of last year's calendar looks like the probably tail of the Federation Meetings and opening of trout season in Pennsylvania. However, let us have an expression of preference via the ballot below.

Please recall the earlier memos to the effect that only full members can have reimbursed transportation, per diem and honorarium. Others are invited, contract funds useable for expenses if available. Regardless of any uncertainty on your part at this time regarding attending the meeting please vote your preference on time.

*No preference*
