Gas Ration Card

With regard to the letter concerning gas rationing, I would like to say that I intend to ask the Ration Board for a "B" book. The distance between my house and the laboratory is three miles, but the work requires that I frequently make at least two trips back and forth and that I do that seven days a week. In addition to that, I use my car to make trips to the University and other parts of the City in direct relation to the work we are carrying on.

In making this request from the Rationing Board, I also intend to take along evidence to indicate that I am working on problems assigned to us by the Ward Department.

Very truly yours,

Albert B. Sabin, M.D.
