

October 27, 1941

Dr. W. Lloyd Aycock
Harvard University Medical School
Boston, Mass.

Dear Doctor Aycock:

Enclosed you find copies of the two letters I had written to Howe concerning the proposed poliomyelitis session. I wonder if a suitable compromise between the decision we have reached (that is, you and I) and his own proposal could take the form of a combination of both types of presentations. By this I mean that we could probably have not more than three presentations not to exceed 10 to 15 minutes on selected topics and spend the rest of the time in questions and answers on other selected topics.

If this meets with your approval I wonder if you would care to convey this suggestion to Howe.

With kindest regards,

Sincerely yours,

Albert B. Sabin, M.D.
