Dr. Albert B. Sabin  
The Children's Hospital Research Foundation  
Cincinnati, Ohio

Dear Albert:

Your letter of March 20 and the virus samples arrived today, intact and frozen. Thank you very much for your courtesy in making these available-- I shall be interested in their properties, and will of course keep you posted. Our visit was most stimulating to me, and I was delighted to make the acquaintance of your charming wife and daughters.

With best wishes,

*Dave*
