

February 20, 1964

Dr. C. Lyn Greening
Wellcome Research Laboratories
Langley Court, Beckenham
Kent, England

Dear Lyn,

Many thanks for your letter of February 13. From correspondence that I have had from the Director of Health in Buenos Aires I am aware of some of the problems and political overtones in connection with the mass use of oral polio vaccine in Argentina. With regard to your question about Messrs. Phoenix, Messrs. Argentin and Messrs. Sancti Spiritu, I know nothing about them and I can only assume that they are agents for companies that are authorized to produce the vaccine - but I have no idea whose agents they are.

With best wishes and kindest regards.

Sincerely,

Albert B. Sabin, M. D.

ABS:meh

P. S. During my visit to Italy last July, I had a transitory illness and collapsed during the course of a lecture in Milan, which is probably the basis of the rumor that you may have heard regarding my illness. I have been working very hard and feeling the effects of fatigue but otherwise seem to be in very good health. I hope that you will soon be back to your normal self.
