

December 14, 1962

Dr. John J. Trentin
Division of Experimental Biology
Baylor University College of Medicine
Texas Medical Center
Houston 25, Texas

Dear Dr. Trentin:

Many thanks for your letter of December 11 and the explanation about the inavailability thus far of the adenovirus 12 ^{transplantable} induced tumor. It would still be of considerable interest to study by the methods that we have developed here the question of a virus-specific tumor antigen in the adenovirus transplantable tumors. Accordingly, I should be very grateful to you for sending me adenovirus 12, and if available also adenovirus 18 transplantable tumors, when such are available.

With many thanks and kindest personal regards.

Sincerely yours,

Albert B. Sabin, M. D.
