Dear Albert,

Our faculty received from the Nobel Committee the invitation for proposing candidates. Rossi and myself put your nomination, so I was charged to write the formal proposition. Although I am quite conscious of your inestimable merits on polio vaccination and your important work in the field of arboviruses, I could easely oversee some others. So I beg you to tell me frankly and without any reserve which points should be placed in the foreground. Perhaps you would be able too for giving some other tips.

With best wishes, I am,

Sincerely yours,

Prof.Dr. C.Hallauer.
